

Utility and Construction Training Limited

Basic Winch Operations

Who Should Attend

All levels of staff

Prerequisites

Familiarity in the principles of winch operations

Aims

To instruct candidates in the safe use of winch machines.

Objectives

On completion of the course, delegates should understand:

- Understand the requirements of the relevant legislation
- Rig, inspect, handle, store and use in a safe and proper manner any accessories used with winches
- Operate safely specific types of winches and carry out pre/post inspection
- Select combinations of equipment to meet safety requirements
- Establish the weight, centre of gravity, balance and dimensions of loads
- List the factors which must be considered when planning a winching operation
- Explain the correct and incorrect operation of winches

Duration

1 Day
